### ShushMoji Feedback Report

Younglings report on the ShushMoji app testing.  
A summary of the testing process and feedback received.

Report Created By: Zaakirah Abrams

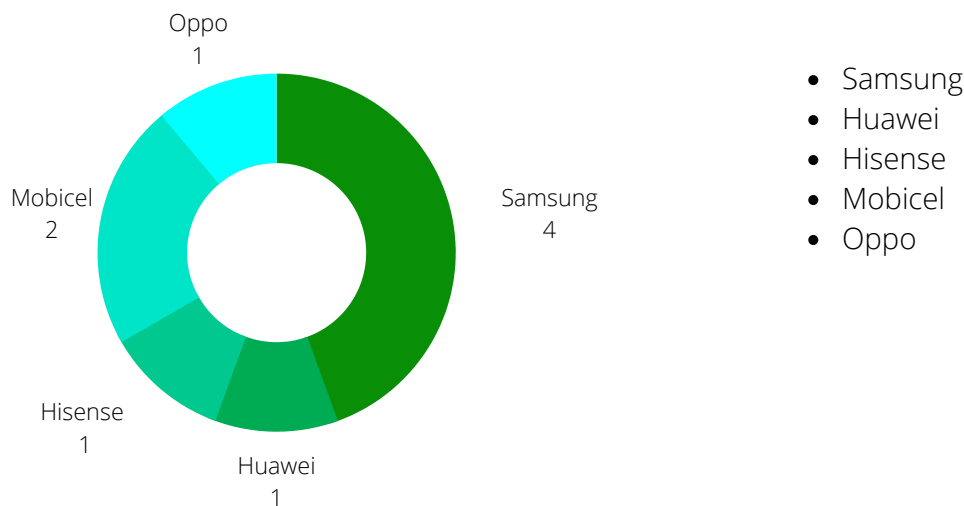

Shushmoji App for Android  
Client: createwith.net  
Developer: Michael Pretorius for Younglings Developer Studio  
Test leader: Zaakirah Abrams  
Date: 29 July 2022

## Usability Report

### Demographics of the testers

Sex	Age	Country
Male	15-24	South Africa
Female	15-24	South Africa
Male	15-24	South Africa
Female	25-54	South Africa
Male	15-24	South Africa
Male	15-24	South Africa
Male	15-24	South Africa

### Mobile devices that were used by testers

Model	OS Version	WhatsApp Version
Huawei P30 Light	Android 10.0	2.22.15. 74
Hisense h50 rock	Android 9.0 (Pie)	2.22.15. 74
Samsung J7	Android 8.1 (Oreo)	2.22.14. 74
Samsung Galaxy A32	Android 12	2.22.15. 74
Mobicel R_7	Android 10.0	2.22.2. 96
Oppo A16	Android 11	2.22.15. 74
Mobicel R_7	Android 10.0	2.22.28. 6

### Access and installations

Were the testers able to see and install the application.

Visible in app store and did it install	Was the icon visible	Did you see the splash screen
Yes	Yes	Yes

### Does the splash screen indicate that the app is launching?

Yes, the app indicates that it is launching, the only problem would be that it loads too fast. It would seem that there is no splash screen because of the fast load.

You wouldn't be able to directly see what the app is at first until the sticker packages show.

### Package purchase and installations

Were the testers able to see, purchase/install the packages

Shushmoji for Free	Stop, silly troll!	Stop, academy bully
Able to see: Yes Able to Install: Yes [4 No]	Able to see: Yes Able to Install: Yes [1 No]	Able to see: Yes Able to Install: Yes
Hey, silly ass!	Stop, torturer!	Stop,sinner!
Able to see: Yes Able to Install: Yes [2 No]	Able to see: Yes Able to Install: Yes	Able to see: Yes Able to Install: Yes [1 No]

### Errors that were found when installing the packages

- Attempt to evoke method
- Attempt to invoke virtual method 'java.io.FileInputStream android.content.res.AssetFileDescriptor.createInputStream()' on a null object reference
- Adds to WhatsApp but does not display on WhatsApp.

## PRIOR USER EXPERIENCES AND SHUSHMOJI IMPROVEMENT RECOMMENDATIONS

Past sticker packs used before and the cost of the packages

New packs and its functionality

Pack Suggestions	Platform Suggestions
Moving stickers Make it have a purpose beyond sending stickers to bullies A meme pack Random troll app If it consists of cyber maybe add more computers More wording stickers that say "I've had enough"	Discord Facebook Telegram TikTok Twitter

Other suggestions and comments.

The favorite buttons need a better location.

The designs are very nice but it needs a little more work

Love the new logo of the app, it really stands out and shows the name of the app.

Icons are really big this time, and white space is very effectively used.
